Aspose.Tasks is a non-graphical .NET Project management component that enables .NET applications to read, write and manage Project documents without utilizing Microsoft Project. With Aspose.Tasks you can read and change tasks, recurring tasks, resources, resource assignments, relations and calendars. Aspose.Tasks is a very mature product that offers stability and flexibility. As with all of the Aspose file management components, Aspose.Tasks works well with both WinForm and WebForm applications.
