ASPrunnerPro is a database management tool that provides easy access and manipulation possibilities for any database on the Web. Designed to suit all users from beginners to experienced developers, ASPRunnerPro creates Active Server Pages (ASP) enabling users to search, edit, delete and add data to the Oracle, SQL Server, MS Access, DB2, or MySQL databases. Version 6.2 adds Audit trail, Record locking, Edit/Add master-details tables on the same page, Section 508 compliance, Search panel (advanced search on the list page), Charts update. Multiple series (unlimited), gauge charts (horizontal, vertical, circular), accumulation charts, scrollable charts, financial charts, bubble charts.
