Automatic MySQL Backup

Address   {value_address}

Contact Person   {value_contact_person}

Mobile Number   {value_mobile_number}

Email   {value_email}

Using cron, mysqldump (included with MySQL) and gzip, this script will take daily weekly and monthly backups of your MySQL databases. Daily and Weekly backups are automatically rotated. Output log can be emailed to whoever is resposible for maintaining the backups. Can create a single backup file for all databases on a server or a seperate backup file for each backup. Plus a number of other features. See changelog in the script for full change history. Rememebr to rate it..
