Email	{value_email}

Calistra's ODBC MySQL Administrator (Coma) is heading towards being a complete database construction tool for MySQL databases. You can manipulate any MySQL database via an ODBC link. MySQL ODBC administrator is loosely based on Sybase SQL Central. Calistra's ODBC MySQL Administrator is a Win32 Application that runs on Windows 95/98/NT. Without writing a single line of SQL you can: Select any MySQL database that has an ODBC driver to it; View the structure of the databases in a hierarchy; Create Databases, Tables, Columns and Indexes; Rename Databases, Tables, Columns; Delete Databases, Tables, Columns; View data in any table; and Edit data in any table.
