

Can Google Spiders read websites built with AJAX?

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Since you are reading this article I will assume that you already know what AJAX is and how it works. You are probably either planning to build a website using AJAX, or have already built a site and are curious as to why your pages are not being indexed in Google.
