CF Time Span Calculation

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

REQUIRES Cold Fusion 5.0 or MX to run- Uses "CreateTimeSpan" to translate both start time and time span into minutes. That way only a simple addition is required to determine end time.-"TimeFormat" is then used to return the start time and end time back to a HH:MM based time format.-Several of the "TimeFormat" formatting options are provided with this script.
