Clarity

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Clarity system integrates different services used by software developers and managers in one universal web-based solution. It helps to automate different everyday tasks in several areas of software development such as project management, issue/bug tracking, documentation and customer support. Clarity is built on Java technology so it can be installed on most operating systems and hardware platforms.
