Design a DHTML pop-up menu that is supported in IE 4+, Netscape 4+, Mozilla 1 and Opera 7 tested on Windows, Mac and Linux. DHTML features include a horizontal/vertical MenuBar, drag & dock ability, scrollable groups, client-side events, custom page integration with client-side functions, .js files based on browser type and quick load times. The design application provides an intuitive layout, on-the-fly preview mode, local and server path options and fast compiling. Saved projects are also compatible with optional ASP and ASP.NET server-side objects to allow expansion into other programming environments.
