Mobile Number	{value_mobile_number}
Email	{value_email}

Comdev Web Blogger is search engine friendly. It is most important that when you blog, search engines are able to index the content that you write. With this simple blog system, you can also setup different view and comment permissions, manage your friend lists or even create multiple sub-blogs on your site. Why use Comdev Web Blogger but not other free sites or scripts? Because free sites don't contribute to the SEO of your site, and free scripts are too complicated for you to customize the template to match your website design. With Comdev Web Blogger, you can easily plug the component into your existing web pages and start to blog straight away!
