Context Menu Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

With IE 5, for the first time, you can now add a context menu to your webpage. What's a context menu? Well, it's a custom menu that pops up in place of the default context menu when you right click your mouse. Use this script to add one to your page.
