

## Creating a Job Scheduler in Java Struts

Address {value\_address}

Contact Person{value\_contact\_person}Mobile Number{value\_mobile\_number}

**Email** {value\_email}

This is a detailed tutorial on how to create a full-featured job scheduler in Java Struts and Hibernate. It comes with a simple login form for the two types of users - Manager and Employee, email notifications support, a checkbox list of employees, a date picker and multiple calendars views (day, month, units, timeline). The tutorial provides code snippets, screenshots and a free ready sample to download. A live demo is available for evaluation.
