

Creating Dynamic Cascading Style Sheets with ASP

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a short tip on how to build dynamic cascading style sheets using an ASP page. Stylesheets are useful for separating the content and presentation of a Web page. While cascading style sheets are static text files, it shows how to generate dynamic style sheets using ASP.
