DHTML Tabs is a versatile, ready-made solution that allows professional and amateur web developers to create superior dhtml navigation systems for their web sites. If you have a large volume of data and your page needs to be scrolled down too much - DHTML Tabs is your choice! Just divide the information and distribute it among the tabs so that your visitors could reach the next piece of information with one single click. You can create text-based tabs, image-based tabs or both together or any others according to your imagination only. This Javascipt Menu/ DHTML Menu supports special effects, floating, relative and absolute positions, animated icons, normal state, mouseover state, pressed state, unlimited submenus, separators, lines and more. Create a cross-browser, search engine friendly, fast-loading web interface of any desired complexity and appearance. DHTML Tabs comes with an easy-to-use GUI wizard DHTML MENU Tuner that allows you to generate the menu in just a few clicks.
