

# DOM XML ticker

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

By combining DHTML with XML, this ticker script makes updating its contents a breeze, through an external XML file. Just open the file, and enter the desired messages to show. Plain text and links (with targeting) are supported, and script is functional in both IE5+ and NS6+, degrading well with the rest.
