Download Page that Displays Available Files Automatically

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is an .asp page that allows you to provide file download capabilities for your site without having to constantly update the page with your file list. It does this by reading the file names in the directory you specify as the download directory, then contructing the appropriate URLs.
