Email	{value_email}

Easily add an Flash FLV Video Player to your Dreamweaver websites using our custom FLV Player Extension. A single external FLV file is displayed within the player using the Flash MX FlashVars for Passing the url to your external FLV file. This loads an external Flash FLV Video file for progressive flv file streaming to be played within our Flash 7 Media Controller. The FlashVars feature is used to specify an FLV file. The FlashVars holds a single relative or full url to the FLV file to be played and can be used as a local or web-based FLV Player.
