DWmail

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

DWmail is an 'intelligent' Web based email application. It allows you to access, manage and send email using any POP3 or IMAP4 email account. Simply enter your email address and password to check your email. Fully supports MIME and HTML based email, attachments, IMAP folders, reply, forward, compose and delete. DWmail also supports reading and sending embedded HTML image attachments. Includes calendar, addressbook, notes, spellchecker, aliases, iCalendar, threading, folder management, external email retrieval, Trash, Sent Mail, WYSIWYG HTML editor, language independent template skinning, read receipts, drafts, moving messages, auto-previewing attached images, signatures, user preferences, message importance, flood checking, RSS reader, maximum recipients per email and saving messages to your local computer. Includes AJAX, background checking for new messages and addressbook auto-complete for composing emails. Supports both MySQL, PostgreSQL & SQL Server databases.
