This version uses 2 swf files, both are under 5KB in size, to dynamically pass the url of the flv file to a larger or fullscreen pop-up window. The right click menu now has FLV movie controls built into the menu to preserve real estate on the player. There are two version of the Dynamic Flash FLV Progressive Video Player both are powered by a PHP script that allows you to serve Flash FLV movies or video of any length from your website without needing Flash communications server.
