

Dynamic Rainbow Color Link Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This cut-and-paste script creates a link that cycles through three colors. Features include settable blink rate; settable blink colors; settable no-blink color; and on/off control via links (optional). A simple function call can also make the link either start blinking when clicked, or stop blinking when clicked. A cool way to emphasize critical navigational elements.
