

E-Card Application v1.0

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A Flash E-Card Application. Send and receive E-Cards. Great promotional tool for your business. Add unlimited jpg or swf E-Cards. FEATURES: * Add an unlimited number of ecards via XML. * full screen (ie, fills the window whatever size it is) * email/form validation * arrows to scroll text that only appear when the text doesn't fit * HTML, swf and php files all included * 4 samples cards with source files included - you can have jpg or swf cards with animation and interactivity * an info tab on the left side of the screen so you can dynamically load your logo and some text there, with built in CSS styling for links. Please note you need a server that allows you to send emails via PHP. New versions may be available in the future. New versions may include features such as dynamic E-Cards that interact with your input text. E.g. the message or recipients name may become part of the actual E-Card animation. Please contact me if you would like to be notified regarding future releases.
