The emagiC CMS.Net framework is one of Europe's fastest growing Content Management Systems for building and maintaining Internet, Intranet and Portal websites. The emagiC CMS.Net framework includes functionality for wysiwyg editing, multi-site management, extranet security, versioning, content scheduling, search integration, role and task management, image editing, collaboration, personalization. It comes with a large set of modules (xforms, active directory, form generation, newsletter,). Through the XForms application, based on the new W3C XForms standard, you manage structured content, such as product catalogues, news items, press releases, jobs. The emagiC CMS.Net framework relies on the MS .NET Framework v2.0. Through the extensive API it provides an open and scalable architecture that can easily be extended and integrated with existing legacy systems. Hence, emagiC CMS.Net is a solid framework for Enterprise Content Management. A FREE version is available for download.
