# Email Address Checker-Validator Script

| | |
|---|---|
| **Address** | {value_address} |
| **Contact Person** | {value_contact_person} |
| **Mobile Number** | {value_mobile_number} |
| **Email** | {value_email} |

Simple cut-and-paste boilerplate script solves a common problem with bad e-mail address entries on forms. The script checks e-mail addresses for all common entry errors using powerful regular expressions. This short, easy, reliable script double-validate e-mail addresses with entry and confirm-entry boxes. Can be used to then refer to a subsequent page or call a Perl script, etc.
