

EMS Data Import 2005 for PostgreSQL

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

EMS Data Import for PostgreSQL is a powerful tool to import your data quickly from MS Excel, MS Access, DBF, XML, TXT and CSV files to PostgreSQL tables. It provides adjustable import parameters, including source data formats for all the fields and destination data formats for the selected fields, commit options, number of records to skip, etc. Data Import for PostgreSQL includes a wizard, which allows you to set all the import options for different files visually, and a command-line utility to execute import in one-touch.
