Mobile Number	{value_mobile_number}
Email	{value_email}

Escort Agency Script is a reliable and SEO friendly PHP script designed for launching an escort site or an escort agency. The script can be set up to run as a site for private escorts or as an escort agency. After installing the escort site, you get an extremely flexible and feature packed back end allowing you to manage profiles, availability days, rates, routes, add custom types, categories, fields, pages, build profile forms etc. The membership plan module that comes with the script allows you to add different subscriptions and charge users for viewing pics, contacting escorts, posting profiles etc. You also may use other premium plugins: Banners or Bump-up to monetize your site. The script comes with a free and fully responsive theme on Bootstrap 3 that can be coupled with other premium themes. The Booking plugin allowing users to book escorts and make down payments is coming soon.
