FLV Podcaster Generator If you are a podcaster, you already know that manually generating your podcast feeds is a real pain. You do have a hard time to figure out all the required tags and how to put the information. And if you are publishing several podcasts a week, the pain is even more to edit and update the feeds. Webmaster Podcaster makes generating and maintaining your podcast feeds a breeze. So if you are generating a podcast feed that has 50 items and you want to edit the 34th item on the 6th week, it will take a few seconds with FLV Podcaster. You do not need to worry about the tags etc. The software will ask for the required information and will generate your feed instantly. The software works on two different modes - that is normal and iTunes, which is even more helpful if you are publishing both! And as a bonus it has a built-in audio recorder to give a jump start to new podcasters.
