

Generating Text Images on the Fly with ASP.NET

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Have you ever needed to have an image of some text generated dynamically on the fly? There are tons of possible applications for this type of thing, but prior to ASP.NET it was a relatively difficult thing to do. This article explains how to generate text images on the fly using ASP.NET. Source code available for download.
