

hardlinks

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Scans a directory tree for hardlinks and writes the information to a file which can then be used by this script to restore the hardlinks. Useful when used in conjunction with a backup format that doesn't handle hardlinks such as tar. Simply include the hardlink information file in the backup.
