

How to determine what server is given web site running on using ASP.NET?

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This comprehensive tutorial will walk you step-by-step to create a single ASP.NET page by which you'll be able to retrieve the server name of any given web site. Explains all the code in detail. Very useful.
