

Image Optimizer .NET

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A .NET component that automatically resizes and optimizes images uploaded to your website based on your configurations. You can also add special effects such as fading around the image. You can easily integrate it with your existing or new ASP.NET projects: Just call the Optimize() method when an image is uploaded!
