With Image Roll-Over Maker, now you can make image roll-overs with a single, easy button push. Fill in a few simple details, and hit the Make Code button -- and your image roll-over shows in a real IE window so you can try it out and test it. Hit the Copy Code button to put the code in your clipboard, then paste it into your page where you want the roll-over to appear. Supports multiple mouseover images, and automatic image preloading is included in the generated code.
