Email	{value_email}

Simply put, JabberChat is a Perl CGI "web-based" product which you can download and install on your web site (like a hit counter or guest book) to provide live chat to your vistors. JabberChat features millions of channels (for public or private chat), whispering "private" messages, directing public messages, fun and interesting teleconference "actions", color codes (for colorful names or chat text), and plain old fun chatting.
