

# Java World Clock

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This Java clock shows the date and time in all 24 time zones simultaneously. You may select AM/PM display and/or Daylight Savings time if you wish. You may also select a time zone other than your own. Because this is a "client-side" application, its time accuracy depends on your computer.
