

Java World Clock

Address {value_address}

Contact Person{value_contact_person}Mobile Number{value_mobile_number}

Email {value_email}

This Java clock shows the date and time in all 24 time zones simultaneously. You may select AM/PM display and/or Daylight Savings time if you wish. You may also select a time zone other than your own. Because this is a "client-side" application, its time accuracy depends on your computer.
