<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Offer job postings on your site with Jobline! Your users can browse jobs or search by job title and apply immediately online. Recruiters can add jobs and update job status throughout the hiring process. The administrator can approve or deny any job and controls publishing status. The Jobline component is an extension to the Joomla CMS which lets you or you clients publish job postings on your website. Job postings can be added by visitors, or registered users, or only by the administrator. Postings can be either published automatically or set to be reviewed by an admin first. Includes application form, a search function, wysiwyg html editor support, templated html, customizable fields and much more. The component is also translated into several different languages besides English. Jobline requires Joomla! v1.0.x or Joomla v1.5.x (with Legacy Mode) to run.
