Joomla-Store is a fork of the CRE Loaded Shopping cart into Joomla. currently version 6.2 patch 09 CRE Loaded is an extension of the OSCommerce shopping cart + several added modules. Joomla-Store took a different approach in the integration : We use the main functionalities of the CRE Loaded shopping cart, We added our own order management module + a shipping & tracking module. We have a library of custom additions: -> video pay-per-view -> link to ebay auctions for checkout -> Classified Ads We stripped the CRE loaded application from modules better handled by joomla: faqs, additional pages, presentation.... The result is the flexibility of Joomla in terms of templates, text presentation and the power of the CRE loaded shopping cart.
