Import datafeeds directly from Shareasale to your website. Add merchant products directly into your Joomla content or use the popular Virtuemart extension as a product showcase. In just a few clicks you can add thousands of products. Instead of making pennies per click for advertising products, make real commissions as an affiliate for hundreds of select merchants. Add just a few products or build an entire shopping mall. View some sample sites or take the component for a test drive and see how easy it works. We have demos and examples on our site, full documentation, and downloads for all required files.
