Updated March 2009! Whether you want to 1. Create a directory like DMOZ, also known as the Open Directory Project. 2. Create a regional directory for your town or city. 3. Create a niche directory about your area of knowledge, phpLD is a great choice. It has an easy to run installer, and an extremely active support forum, where you can get help learning how to use your directory, as well as find templates and mods. We look forward to seeing you soon over at phpLD, and appreciate you taking the time to investigate our product.
