LSWebEnterprise Solution

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

It uses HTTP protocol for sending files from a local system to a web server and vice versa. It converts heavy BMP files into JPEG and GIF formats with perfect quality. It allows users to send mail from a web page or windows application to multiple recipients at a time. It also converts .doc, .xls and .ppt files into HTML, TXT, RTF, GIF, PNG and various other formats.
