

# Magento Booster

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Now you can speed up the performance of your store thus increasing your conversion rate and lowering your bounce rate with Magento Booster. This extension fully caches the pages and, without initializing Magento, provides your visitors with ready output that takes significantly less time to load. It also deflates the size of the Java Script code on your website, which contributes to the faster page rendering. As a result the extension lowers the server load, which means your server can handle more visitors simultaneously. With this extension, your customers will enjoy higher performance, and you will benefit from lower server load and higher conversion rate. Full description is available at the product page
