Magento Shop by Brand Module

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Upon getting a lot of brand names in your shop you really need a way to sort and describe all these brands. And your clients might want to sort the products according to their brand or manufacturer names. And our Shop by brand extension is your best helper in this process. Brands and Logos extension allows you to create a list of brands, using your admin panel. After that a brand (with an uploadable logo) can be added to every specific product, and brands can be displayed as a filter on category view. You can add logos and create a special description page for every brand, as well as displaying all brands in your shop. All features are separately customizable and adjustable, including sizes, fonts and buttons.
