Mobile Number	{value_mobile_number}
Email	{value_email}

The Menu Generator is a JavaScript Program which integrates dropdown-Menus into your WebPage. Very simple to handle and with many options to configure. If you wish, you can have your menus Windows-like, or even better - exactly the way you want them to look. Just add a list of menu entries and you'll have the dropdown menus on your own Webpage, with an unlimited number of submenus. Version 1.1.0 contains bugfix for Netscape 6.x/7.
