MessengerXM

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

With MessengerXM your site will come alive! Add IM capability to your own site and allow visitors or clients to communicate with each other in real time while still browsing your site or the Internet. It will make visitors to your site want to come back again and again, which means more sales and more traffic for you. The client has absolutely nothing to install or download. It all works seamlessly within your client's browser. Our standard MessengerXM product can be further customized to fit your specific needs and requirements. If this is something you would like to explore, please contact us for more information and quotes. However, customization is not required and MessengerXM will work out-of-the-box as is. Give your visitors something to talk about.
