

# Multi-Location Inventory for Magento

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The extension allows for managing inventory quantities on multiple Magento websites from one Magento installation. This is a must-have for those who run several stores that serve different geographical areas. With this extension admin is enabled to: \* Specify different inventory levels for each website; \* Track inventory level for each website; \* Track low stock for each website (the extension supports Magento Low Stock feature); \* Update attributes per website (the extension supports Magento Update Attribute feature). The extension is available for Magento Community Edition and Magento Enterprise Edition
