

.NET ImageUtil

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Parses all major digital camera image meta tags (camera make, model, ISO, shutter speed, comments etc.). Additionally provides shared/static resize methods that let you specify the exact height and width or just the longest side to automatically maintain aspect ratio. Both .resize methods preserve the original meta data in the new copy!
