.netCHARTING Enterprise Edition

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

.netCHARTING seamlessly integrates database access, data aggregation and date handling with dynamic chart rendering. This unique combination of features provides you with immediate access to your existing data, from Access to SQL Server, in stunning visual formats. .netCHARTING includes an extensive suite of charting types with powerful combination types along with pies, bars, columns, lines, arealines, points, splines and more in both 2D and 3D views. Significant new features in version 3.2 see http://www.dotnetcharting.com/versionhistory.aspx
