One-Page Checkout Booster for Magento

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Help your customers spend less time while placing an order – this will leave less time for them to change their mind about making the purchase. One-Page Checkout Booster enables you to simplify the Checkout and merge it with the Shopping Cart step for better user experience and higher conversion rate. The extension expands all checkout steps and displays them on one page, so that your customers know in advance what fields they'd have to fill out. This increases trust and significantly reduces cart abandonment. With One-Page Checkout Booster your customers will find it easier to place an order, because they will have to do significantly less clicking, and your returning customers will be able to place an order with just one click! Full list of features is available on the extension homepage.
