Owwlish makes it a breeze to build and add an online course into any website or sales funnel platform. Connecting your website to your Owwlish account in just a few clicks away and build that online course website within just a few hours instead of weeks! Whether you're a developer or agency helping clients with their web projects involving online courses and memberships, you'll want to build their course so that they can manage it themselves. Owwlish is designed to be beautiful and super simple, which helps with the first impression of your client. Uploading of video lessons is very quick and easy. All the headaches of trying to upload your videos in places like Youtube, Vimeo, or AWS and trying to figure out how to get those videos to display in your course are gone in Owwlish. Just drag the file onto the upload box, wait a few minutes, and voila: your students will be able to enjoy video lessons in high definition.
