PageXchanger for IIS

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

PageXchanger eliminates file extensions from URLs and source code for a more secure and user-friendly IIS Web site. Port80's powerful content negotiation tool separates content from underlying Web technology, allowing for short, easy-to-remember URLs. Underlying technology is less conspicuous to hackers and competitors, and developers can transition file formats without altering page addresses. Free 30-day trial and free technical support.
