

## PHP Form Builder --

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Do you want to build and manage a fully functional uploading form where your visitors can upload files (images, audio , video, ...) and submit data (name , email ,contact info ,...)? This tool is the answer for you, Using this script you can visually build a form with multiple uploading fields to accept only the file types , size you specify, you can also add any other types of fields like (text boxes, drop down menus, check boxes and even custom lists for world countries and US stats). The generated PHP form is very customizable ; you can select the form style you want, add a progress bar to indicate file uploading progress, add User authentication to allow only registered users to use your PHP forms, and much more.. The tool includes also a File browser to navigate, view, edit, search and delete what your visitors have submitted through your php form and you have the ability to backup the uploaded files. Try the free online demo to see why so many chooses this tool.
