phpBB Revenue Sharing MOD

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a MOD for phpBB that allows you to offer your members a share of the revenue that their topic makes through the Google AdSense Programme. The installation is quick and easy and it's a great method of promoting your forum. ==Features== * Default setting of 1:1 revenue sharing ratio. * Ads are shown in the header. * Ability to set default publisher-ID and channel. * Ability to turn revenue sharing on and off. * Ability to set the minimum number of posts before members can participate in revenue sharing. * Participants can submit channels as well as publisher IDs. * Publisher IDs entered by users are checked for correct length before being shown. If they have incorrect length the default ID is shown. * Members are not shown their own ads to prevent click fraud and accidental clicks. ==Updates== v0.03 - Ads now do not display on posting.php, ad_profile.php and profile.php. This is to prevent breaking the Google AdSense ToS.
